

Oxford-Ghent Dialysis and Transplantation Summer School 2018

September 19th - September 22nd, 2018
Corpus Christi College, Oxford, UK

An interactive course
for young practising nephrologists

Aim of the course:

- To offer a 4 day highly interactive course on practical management of end stage renal disease, dialysis and transplantation.
- The aim of the course is to disperse available knowledge and differences in practice among young practitioners.
- Information and education is provided in 21 workshops, in small groups (max 15 participants per group) by experts in the field. All workshops and discussions start from clinical cases. In addition, 7 plenary lectures are planned.

Who can apply for the course:

- The course is open to participants from Europe
- The course is intended for nephrologists in their last year of training or who have just finished training
- In order to enhance participation, fluent knowledge of English is mandatory. Applications will be screened by the organising committee
- Participants arrange their own travel and pay a personal registration fee of € 350 / £ 320 - accommodation in a standard college room is included in this fee. Arrival in Oxford is on September 18th, 2018.

Topics covered during the course:

Interactive tutorials

- Predialysis strategies: modality selection, anaemia management, prevention of comorbidity, options in the elderly
- Non-renal problems in patients with ESRD: Infectious complications in ESRD, pregnancy
- Haemodialysis strategies and problems: latest thinking in bone and mineral metabolism, access problems, volume status assesment, convective vs diffusive dialysis, alternative dialysis strategies
- Peritoneal dialysis: CAPD/APD modality selection, evaluation of membrane characteristics, plasmaferesis indications and strategies
- Transplantation: assessment of donor and recipients, combined transplantation, work up of early transplant failure, early surgical and medical complications of transplantation, chronic allograft nephropathy, late complications of transplantation and immune suppression, approach to the patient with a failing graft

Discussion forums

- Maximising transplantation options
- Basic principles in PD
- Basic principles of haemodialysis
- Paediatric to adult transition of RRT care
- Clinical evidence, economic and social aspects of ESRD

Application for the course:

Register [online](#) should you wish to apply to attend the course and send your application via email.

All applications for this course should be sent via email as word file to isabel.vandorpe@ugent.be before July 7th, 2018. Applications should have the following format: First page: address, home address, e-mail address, phone and fax number and at least one name and correspondence address of a reference person. Second page: short CV, including clinical experiences. Third page: short description of what you expect to learn from this course and why you want to apply. Notification of eventual acceptance will be sent by email before July 15th, 2018. Details with regards to accommodation and payment of the registration fee will be sent with confirmation of participation.

E-mail: isabel.vandorpe@ugent.be

Congress Venue

Corpus Christi College
Merton Street
Oxford
OX1 4JF

Corpus Christi College is conveniently located in the centre of Oxford, tucked away from the hustle and noise of the city's main streets, looking over Christ Church Meadow towards the Thames.

There is easy access to the University libraries, lecture rooms and the city shops including the famous covered market; yet it is also free from the heavy traffic of the High Street and enjoys direct access to the open spaces, river-side paths and tree-lined walks of the meadow. Architecturally,

it successfully blends the old with the new.
